# Gijnlim

## Gijnlim F1

**Gijnlim is a 100% male hybrid and ideally suited for cultivation of both white and green asparagus in temperate climate zones. This variety is an exceptionally early grower and gives very high productivity. Gijnlim is ideal for forced cultivation conditions. This variety is also highly valued for direct farm sales.**

**Cultivation** Gijnlim performs well on sandy and clay soils. The more fertile the soil is, the later spear thickness will remain good even when the season is advanced. Extensive practical experience has shown that the best results for white asparagus are achieved with a planting density of 3 - 3.5 plants per m<sup>2</sup>. This plant density can be increased by approximately 30% if the asparagus is harvested green. Higher planting densities give a higher yield, but can lead to an accelerated decrease in spear thickness over the years. Thanks to its natural earliness, Gijnlim is ideally suited for extra forcing techniques, such as anti-condensation plastic mulch, mini tunnels and plastic mulch.

**Product** Gijnlim has a very high production potential and exceptional quality. The main grade is class 16 - 24 mm. Gijnlim has an excellent closed tip, is straight and smooth with high physiological rust resistance. Good post-harvest handling will prevent pink discoloration.

**Foliage** Gijnlim has full and heavy foliage. If correct attention is paid to disease control, the foliage remains sufficiently green and strong right into the autumn.

**Table of variety traits of the Limseeds assortment.**

	Relative yield <sup>1</sup>	Diameter <sup>1</sup>	Earliness <sup>1</sup>	Climate <sup>2</sup>	White/green <sup>3</sup>
Avalim	100	7	9	Temperate	White / green
Backlim	100	8	6	Temperate	White / green
Gijnlim	115	6	9	Temperate	White / green
Grolim	105	9	8	Temperate / warm	White
Herkolim	105	9	7	Temperate	White
Horlim	100	8	7	Temperate	White
Thielim	105	8	8	Temperate	White

<sup>1</sup> The higher the score, the more positive the trait rates.

<sup>2</sup> Temperate = the climate compared to North West Europe; Warm = the climate compared to South Europe.

<sup>3</sup> Suitable for cultivation of white and/or green asparagus
