

# Thielim

## Thielim

- High production potential
- Uniform quality and grades
- Straight, smooth stems with good thickness
- Highly suitable for peeled processing
- Strong foliage; high tolerance to foliage diseases

the asparagus breeding company

# Thielim

## Thielim F1

**Thielim is a 100% male hybrid and highly suitable for production of white asparagus in a temperate climate. This variety has average earliness and a good production capacity. Thielim is suitable for both fresh sales as well as industrial processing or ready peeled sales.**

**Cultivation** Thielim grows best on fertile, well-drained soils. Soils susceptible to flooding are less suitable. Thielim performs optimally under warm and fertile conditions, giving high quality and high kilos. Extensive practical experience has shown that the best results are achieved with a planting density of 3.5 - 4,5 plants per m<sup>1</sup> with a planting depth of 18 - 20 cm. Thielim also performs well under various types of plastic mulch.

**Product** Thielim has a very high production potential and exceptionally uniform quality. The product has firm, closed tips and a high resistance to grooves, pink discolouration and hollow stems. The main diameters are between 20 - 28 mm.

**Foliage** The foliage is strong, erect and has a natural tolerance to foliage diseases. These qualities also make Thielim ideal for organic cultivation methods.

**Table of variety traits of the Limseeds assortment.**

	Relative yield <sup>1</sup>	Diameter <sup>1</sup>	Earliness <sup>1</sup>	Climate <sup>2</sup>	White/green <sup>3</sup>
Avalim	100	7	9	Temperate	White / green
Backlim	100	8	6	Temperate	White / green
Gijnlim	115	6	9	Temperate	White / green
Grolim	105	9	8	Temperate / warm	White
Herkolim	105	9	7	Temperate	White
Horlim	100	8	7	Temperate	White
Thielim	105	8	8	Temperate	White

<sup>1</sup> The higher the score, the more positive the trait rates.

<sup>2</sup> Temperate = the climate compared to North West Europe; Warm = the climate compared to South Europe.

<sup>3</sup> Suitable for cultivation of white and/or green asparagus
